ORCID: 0000-0002-2317-3807

## RESEARCH FOCUSES

---

- Ultrasound-responsive functional materials and devices
- Energy harvesting for biomedical applications
- Wearable ultrasound

## TECHNICAL SKILLS

---

- Synthesis of triboelectric/ferroelectric composite materials
- Design and optimization of electro-mechanical energy harvesters/transducers
- Vibration measurement and analysis using laser doppler vibrometer
- Computational simulation through COMSOL Multiphysics (FEM)
- Preclinical tests for biomedical engineering (Mouse, rat, and pig model)

## DEGREE & EDUCATION

---

### Ph.D. student in Advanced Material Science & Engineering

Mar 2021 – Present

Sungkyunkwan University (SKKU), Advisor: Prof. Sang-Woo Kim

### B.S. in Chemistry/ Chemical Engineering

Mar 2015 – Feb 2021

Sungkyunkwan University (SKKU), Suwon, Republic of Korea

## PUBLICATIONS
